

Low-Profile CFL Downlights (AFLP, AFWLP, LGFLP families)

Gotham is proud to introduce a new line of downlights, designed specifically for shallow plenum applications. The offering boasts a comprehensive mix of compact fluorescent luminaires, in both 6" and 8" apertures, that address shallow plenum needs without compromising the quality of light you expect from Gotham.

FEATURES & BENEFITS

Shallow recessed plenum applications

- Measures only 4-3/8" in height above the ceiling
- Fixture provides great performance when plenum depth is an issue

Comprehensive product offering

- Available in both 6" and 8" apertures
- AFLP series open reflector units in cross-baffle or wallwash configurations, providing various levels of shielding
- LGFLP series lens units with trim choices of regressed white, stepped baffle or regressed anodized
- Emergency battery backup with remote test switch
- Non-conductive shower trims available this fall

Quality you can count on

- Increased luminaire efficiency
- Reflectors provided with a spring-hinged lamp door to minimize light loss into the plenum
- Tailored light quality available through multiple lens choices — tempered prismatic, Solite, flat opal lenses (with or without cross-baffle)

Control at your fingertips

- CFL downlights available with Sensor Switch's nLight™ dimming control relay ([Click here for details.](#))
- The latest in energy management by the leader in digital lighting solutions
